### DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-43 and 48-56 drawn to an accelerometer, classified in class 73, subclass 504.140.

- II. Claims 44-47, drawn to a method of preventing crack propagation, classified in class 73, subclass 799.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are the apparatus of Group I that is an accelerometer and does not require the method of the invention of Group II to perform its function.

3. Should the applicant elects the invention of Group I or II, the following election of species is deemed proper and thereby imposed.

There are no generic claims.

Species best illustrated by Group I:

1. 1-43

2. 48-56

Species best illustrated by II:

1. Claim 44
  2. Claim 45
  3. Claim 46
  4. Claim 47.
4. Because of the complexity of the issues at hand, no telephone call was made.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
